Advisory No. _006_ s. 2023
January 11, 2023

In compliance with DepEd Order No.8, s. 2013
This advisory is issued not for endorsement
but for the information of DepEd Officials/ Personnel/
Staff as well as the concerned public per DepEd Order No. 28, s. 2021

Data Analytics using Python In-depth Training Workshop – February 15 to 17, 2023 (PHP2900.00) via Zoom

The STRATOne invited all software developers, data scientists, and academic scholars to attend Data Analytics using Python In-depth Training Workshop on February 15 – 17, 2023 via Zoom Platform.

The objective of the training-workshop is to:

- Learn how to manage and prepare your data using Python/SPYDER.
- Learn the do's and dont's of using descriptive, inferential statistics and linear regression.
- Learn how to create a data visualization using RStudio.

For more information about the training workshop, please contact STRAT One, Yakal Road, Tunasan, Muntinlupa City, Tel. no: 02-8-801-5903/09984604375.

<u>Data Analytics using Python In-depth Training Workshop – February 15 to 17, 2023 (PHP2900.00) via Zoom</u>

While it is true that you can learn coding or programming on your own, studies suggests that a person can learn coding or programming in an average of six months. With STRATONE, you will learn coding or programming within three days.

Python gained appeal among software developers, data scientists, and academic scholars due to its simple syntax. It is the most common option for machine learning and data processing because its simplicity is optimal for solving complicated challenges and makes it the most popular choice for machine learning.

If you have the capabilities to learn a coding concept and the ability to adapt to new technologies, we are inviting you to join Data Analytics using Python In-depth Training Workshop – February 15 to 17, 2023 (PHP2900.00) via Zoom. The fee includes: 12% VAT, digital handouts, datasets, digital certificates (of participation, completion, and attendance), recording of the webinar, and the learning experience. OFFICIAL RECEIPTS will be provided upon payment.

Key Learnings:

*Learn how to manage and prepare your data using Python/SPYDER.
*Learn the do's and dont's of using descriptive, inferential statistics and linear regression.
*Learn how to create a data visualization using RStudio.

According to Potomac.edu, there are advantages to learning programming, such as you develop problem-solving skills, you may use this skill to seek a part-time job, and it allows you to be creative.

Attending virtual workshops with STRATONE is inflation-proof:

- Does not require a significant amount of funding (it does not require budget allotment on transportation costs and meals during travel).
- If you missed a portion of the workshop, you can easily replay the recording.
- STRATONE has a net promoter score of 65% (above the industry benchmark), plus our customer satisfaction is 8.9/10.
- Trainers are very approachable.
- Aside from informational workshops, we are also entertaining.

Personal benefits of these workshops:

- You can use our certificates to redeem CPD points (https://cpdas.prc.gov.ph/public/main-page.aspx).
- Participating in workshops and training is a great opportunity to expand your horizons, meet new people in your field, find the motivation to improve your profession, and have a good time while doing so.
- The skills that you will accumulate from these workshops are embedded in you.
- You may apply this knowledge throughout your professional career, and in your personal life and it may help you find new or additional sources of cash flow.
