**NATIONAL MINING, METALLURGICAL, AND MATERIALS  
ENGINEERING (NMMME) WEEK 2024**

The UP Mining Metallurgical, and Materials Engineering Association,  
Inc. will conduct the NMMME Week 2024 on May 2-4, 2024.

There will be series of engagements, competitions, and workshops to  
promote the fields on Mining, Metallurgy, and Materials engineering.

The event aims to help the students to explore an underrated field of  
engineering and to prepare them as they enter higher education.

Expected participants are Junior and Senior High students from  
private and public schools.

ORD/PAU

Greetings!

We are the UP Mining, Metallurgical, and Materials Engineering Association, Inc. or UP 49ers, a premier student organization of the College of Engineering at the University of the Philippines - Diliman. Established in 1954, our academic organization has long been serving the engineering community and the country by producing renowned leaders and engineers in the fields of Mining, Metallurgical, and Materials (MMM) engineering.

Continuing its legacy, the organization will conduct the **National Mining, Metallurgical, and Materials Engineering (NMMME) Week 2024**. This will consist of a series of engagements, competitions, and workshops to promote the fields of Mining, Metallurgy, and Materials engineering to high school students all over the country.

The NMMME Week 2024 will have both face-to-face and online components, which means students can participate in some engagements if it is not possible to join the physical events that will be held at UP Diliman. However, we highly encourage joining the face-to-face component of the NMMME Week 2024, so students and the faculty can immerse themselves in the NMMME experience. We can offer logistical assistance by providing a list of possible accommodations near the venue.

As such, we are pleased to invite the schools within the division to participate in the NMMME Week 2024 this coming **MAY 2-4, 2024**. We believe this endeavor will help the students explore a rather underrated field of engineering and prepare them for their possible career paths as they enter higher education. We urge you not to miss this opportunity for your students.

Attached herewith are the event details for NMMME Week 2024. For further discussion and inquiries, kindly direct them by creating a new thread through this email. You may also contact us through our facebook page: <https://www.facebook.com/NMMMESummit>.

Thank you very much, and we look forward to seeing you!

**Louise Savinica Diego**
